AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Original) A self-inflating article comprising:

- a) an inflatable bladder comprising a substrate;
- a) at least one rupturable reservoir associated with said inflatable bladder;
and
- b) a cleansing composition.

Claim 2 (Original) The article of Claim 1, wherein said substrate comprises a first layer and a second layer comprising a web wherein said web comprises a sack.

Claim 3 (Original) The article of Claim 2, wherein said web comprising said first layer and said second layer are liquid impermeable.

Claim 4. (Original) The article of Claim 3, wherein said web is selected from the group consisting nonwovens, formed films, films, composite material, laminates, wovens and combinations thereof.

Claim 5 (Original) The article of Claim 2, wherein said web comprising said first layer is liquid impermeable and said second layer is liquid permeable.

Claim 6 (Original) The article of Claim 5, wherein said web is selected from the group consisting of nonwovens, formed films, films, composite material, laminates, wovens and combinations thereof.

Customer No. 27752

Claim 7 (Original) The article of Claim 2, wherein said web comprising said first layer and said second layer are low liquid permeable.

Claim 8 (Original) The article of Claim 1, further comprising a gas evolving composition wherein said gas-evolving composition is associated with said inflatable bladder.

Claim 9 (Original) The article of Claim 8, said gas evolving composition further comprises an alkaline and an acidic material.

Claim 10 (Original) The article of Claim 9, said alkaline is selected from the group consisting of salts of carbonates and bicarbonates, alkaline peroxides, alkaline azides and mixtures thereof.

Claim 11 (Original) The article of Claim 9, further comprising less than about 75 gsm of said alkaline material.

Claim 12 (Original) The article of Claim 9, said acid material is selected from the group consisting of C₂ to C₂₀ organic mono- and poly-carboxylic acids, C₂ to C₂₀ organophosphorous acids, C₂ to C₂₀ organosulfur, toluene sulfonic acid, peroxides, lactones and mixtures thereof.

Claim 13 (Original) The article of Claim 1, wherein said rupturable reservoir contains a reaction material.

Claim 14 (Currently Amended) The article of Claim [[8]] 13, said reaction material is selected from the group consisting of water, salts of carbonates and bicarbonates, alkaline peroxides, alkaline azides, C₂ to C₂₀ organic mono- and poly-carboxylic acids, C₂ to C₂₀

organophosphorous acids, C₂ to C₂₀ organosulfur, toluene sulfonic acid, peroxides, lactones and mixtures thereof.

Claim 15 (Original) The article of Claim 14, wherein said reaction material is selected from the group consisting of water, citric acid, sodium bicarbonate and mixtures thereof.

Claim 16 (Currently Amended) The article of Claim [[1]] 13, wherein said rupturable reservoir delivers said reaction material within said inflatable bladder.

Claim 17 (Currently Amended) The article of Claim [[1]] 2, said cleansing composition is located on at least one surface of said web of said first layer.

Claim 18 (Original) The article of Claim 1, said cleansing composition is selected from the group consisting of anionic lathering surfactants, nonionic lathering surfactants, amphoteric lathering surfactants, and mixtures thereof.

Claim 19 (Currently Amended) The article of Claim [[1]] 2, further comprising a third layer comprising a web wherein said web is selected from the group consisting of nonwovens, formed films, films, composite material, laminates, wovens and combinations thereof.

Claim 20 (Currently Amended) The article of Claim [[13]] 19, said third layer is in communication with and juxtaposed to said first layer.

Claim 21 (Currently Amended) The article of Claim [[13]] 19, said third layer further comprising a cleansing composition on at least one surface of said third layer.

Claim 22 (Currently Amended) The article of Claim [[13]] 19, further comprising a fourth layer in communication with and juxtaposed to said first layer wherein said third layer

Appl. No. 10/644,537

Customer No. 27752

comprises high loft material which exhibits a density of from about 0.00005 g/cm³ to about 0.1 g/cm³ and a thickness of from about 0.1 mm to about 30 mm.

Claim 23 (Currently Amended) The article of Claim [[16]] 22, wherein said high loft material of said fourth layer comprises a cleansing composition associated with said fourth layer.

Claim 24 (Original) The article of Claim 1, further comprising a bonding site located at a center location of said article wherein said bonding site is selected from the group consisting of point bonding, bonding lines, bonding areas and combinations thereof.

Claim 25 (Currently Amended) A self-inflating article comprising:

- c) an inflatable bladder comprising a substrate; and
- d) at least one rupturable reservoir is associated with said inflatable bladder[[;]].

Claim 26 (Original) The article of Claim 21, further comprising a cleansing composition wherein said cleansing composition is added at the point of use.

Claim 27 (Canceled)

Claim 28 (Original) A kit for cleansing the skin and other keratinous surfaces, said kit comprising:

- a) a container having a seal that is removed prior to first use of the article, said container having a cover wherein the cover protects the products not in use; and
- b) a self-inflating personal care article comprising:
 - 1. an inflatable bladder comprising a substrate;

2. at least one rupturable reservoir associated with said bladder; and
3. a cleansing composition.

Claim 29 (Original) The kit of Claim 28, said cleansing composition is located on at least one surface of said article.

Claim 30 (Original) A kit useful in either a wet or dry environment for cleansing the skin and other keratinous surfaces, said kit comprising:

- a) a container having a seal that is removed prior to first use of the article, said container having a cover wherein the cover protects the products not in use; and
- b) a self-inflating personal care article comprising,
 1. an inflatable bladder comprising a substrate;
 2. at least one rupturable reservoir associated with said inflatable bladder;
 3. a cleansing composition;
 4. a third layer in communication with and juxtaposed to said second layer; and
 5. a fourth layer in communication with and juxtaposed to said third layer.

Claim 31 (Original) The kit of Claim 30, said cleansing composition is located on at least one surface said article.
